What is your role on campus, and what comes to your mind when you hear Adaptive Learning?

- Faculty
- Staff
- Administrator
- Others

Diversity of Adaptive Learning Systems

What is adaptive learning?

Adaptive learning, also known as adaptive teaching, is **an educational method which uses computer algorithms to orchestrate the interaction with the learner and deliver customized resources and learning activities to address the unique needs of each learner**. In professional learning contexts, individuals may "test out" of some training to ensure they engage with novel instruction. Computers adapt the presentation of educational material according to students' learning needs, as indicated by their responses to questions, tasks and experiences.

Wide range of adaptivity

- CogBooks
- Realizeit
- Macmillan LaunchPad

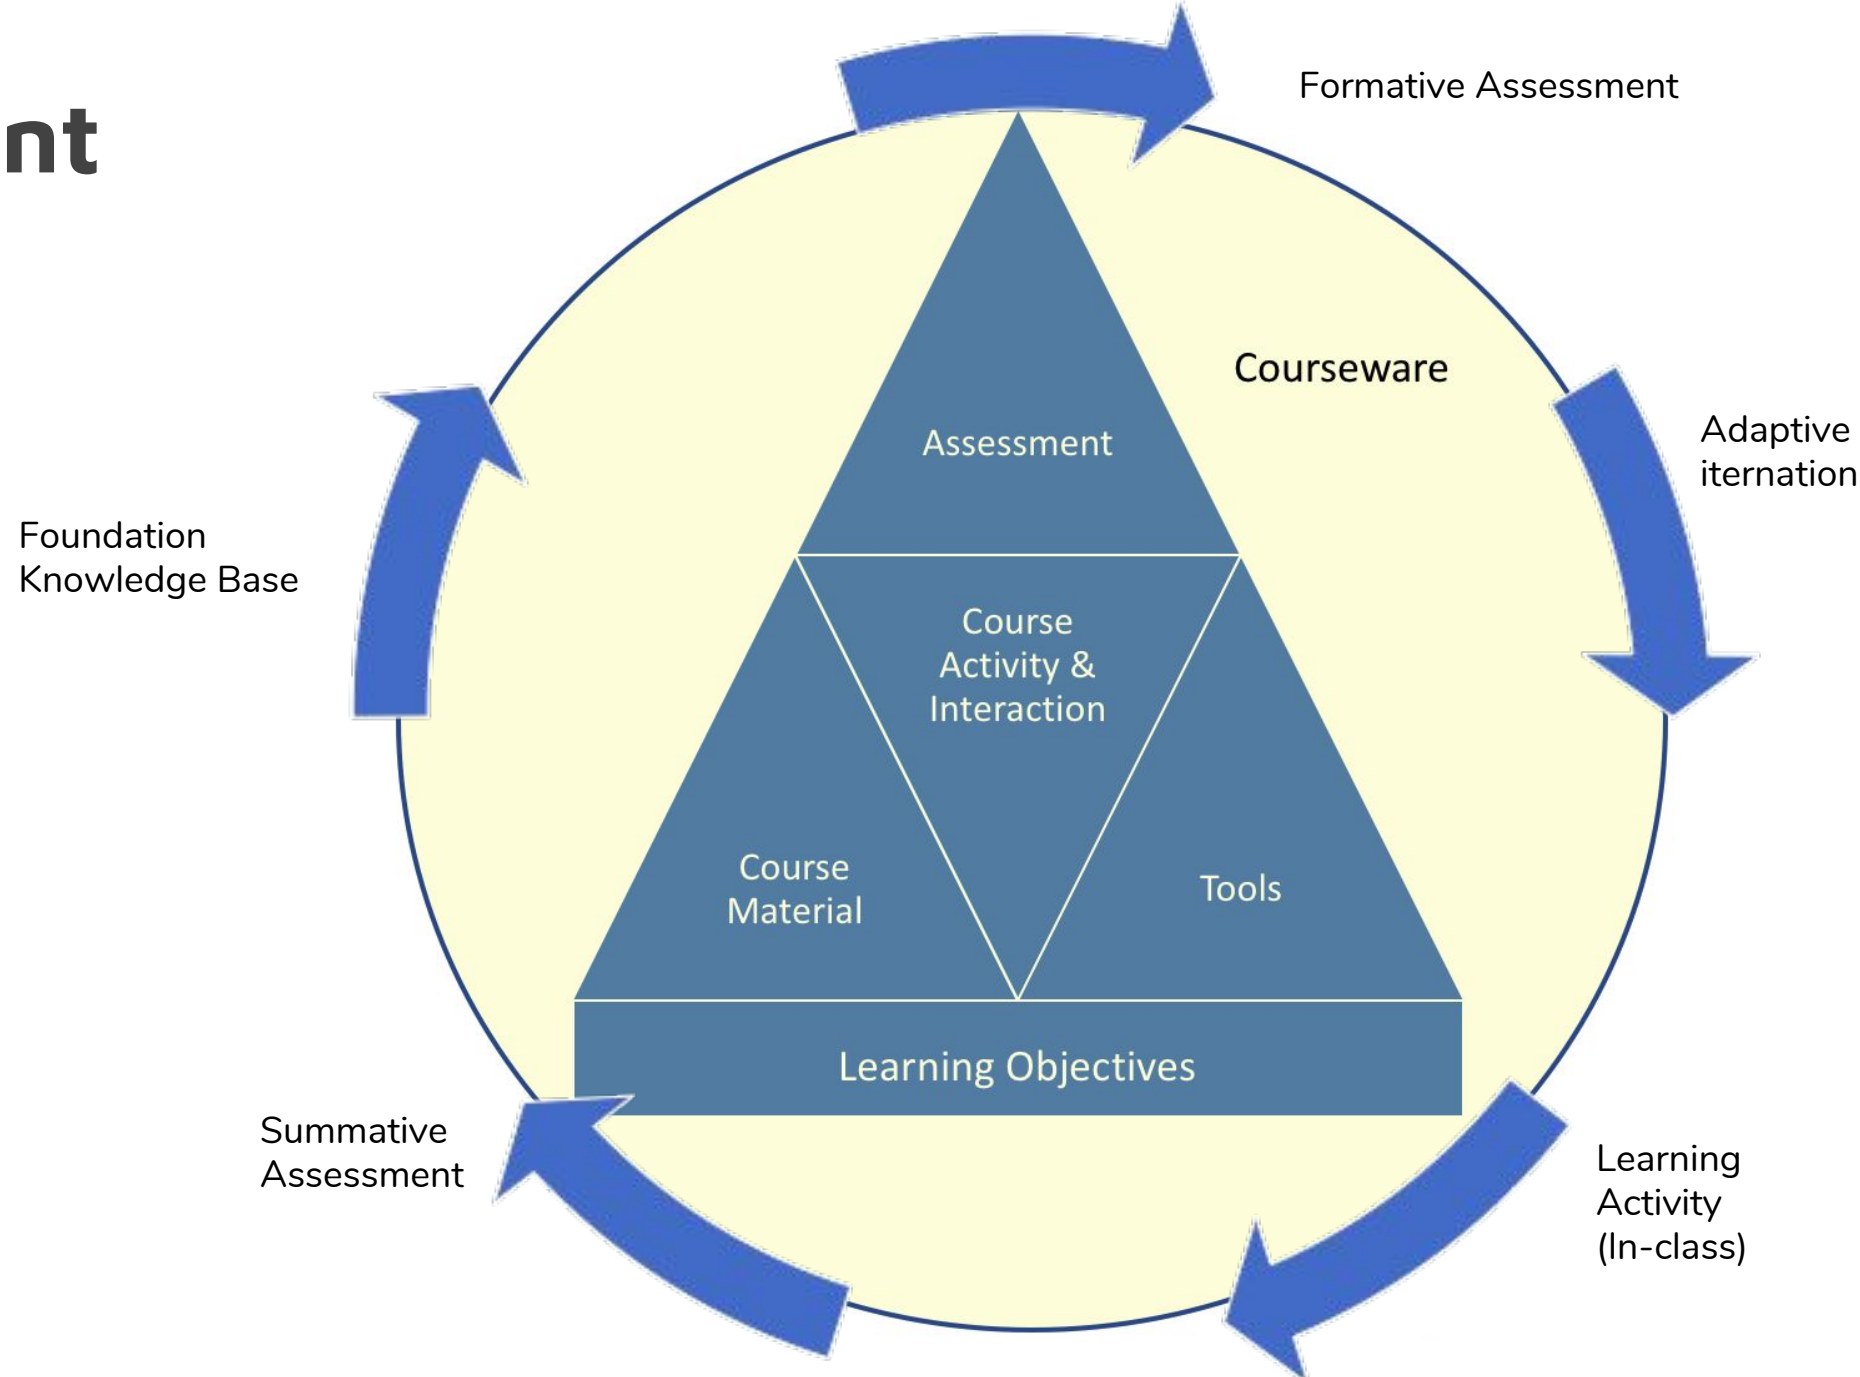

Uniqueness of adaptive learning design

- Value: Personalized, mastery learning in large-enrollment courses
- System complexity
 - System as a “platform”– Learning curve and system training
 - Data analytics – Plan ahead the data use
- Team approach
 - Faculty team as a SME team, Vendor as a system expert, & Instructional designer for the support of...
- Design first – Course mapping and alignment
- Start small, reflect, and continuous improvement – Expectations

Design First - Course Map and Alignment

Alignment

Our design experience: The course

PSYC 1101 General Psychology

Team of four faculty members

- QM Faculty Fellow lead the teaching team
- Review, analyze, and align course contents and instruction plan as SME
- Prepared detailed course map

Instructional Designer

- ID consultation on course design
- LMS training / Courseware integration

Courseware Provider

- Platform training
- Export analytics data

CTL Tech Team

- Integration of multiple technologies

Instructional Design Support

Design support: Project Management

Support like a course development project

- Facilitate project meetings
 - Kickoff, Milestones, Completion, & Reflection
- Establish milestones and timeline
 - System training
 - Course design mapping
 - Canvas training & Canvas course development
- Facilitate team collaboration
 - Google folder - Resources and meeting notes
 - Canvas development course
 - Email

- We discussed using Packback Curiosity scores as "extra credit challenge" for each unit exam (students who earn scores in top 20% of class during 3 chapters, get 2 points on following unit exam)
- Every week we highlight a top Packback student question during lecture
- We also want to make sure we cover at least one concept, mnemonic, acronym, example, etc. in lecture that is not covered in the text. We should make this **explicit** so students understand why lecture is so key.
- The "Assess your Strengths" activity could be great to assign as it aligns with CO5
- Student Preface: Time management – can we assign this? Also aligns with CO5

Meeting 1, 5/29/2018, 1-2pm - Kickoff

Week 5 - MEMORY	
Week 5 Overview-2	✓
Memory Slides Week 5.pptx	✓
Poll Everywhere 9.17 Sep 17, 2018 6 pts	✓
Week 5 Activities	✓
LearningCurve Module 24: Storing and Retrieving Memories Sep 16, 2018 10 pts	✓
LearningCurve Module 23: Studying and Encoding Memories Sep 16, 2018 10 pts	✓
LearningCurve Module 25: Forgetting, Memory Construction, and Improving Memory Sep 16, 2018 10 pts	✓
Assess Your Strengths: How Might You Improve Your Memory? Oct 1, 2018 5 pts	✓
Week 6 - CONSCIOUSNESS	
Week 6 Overview	✓
Week 6 Activities	✓
LearningCurve Module 7: Basic Consciousness Concepts Sep 23, 2018 10 pts	✓
LearningCurve Module 8: Sleep and Dreams Sep 23, 2018 10 pts	✓
LearningCurve Module 9: Drugs and Consciousness Sep 23, 2018 10 pts	✓
Assess Your Strengths: Are You Sleep-Deprived? How Can You Improve Your Sleep? Nov 1, 2018 5 pts	✓
Week 7 - BIOLOGY OF THE MIND	
Biology of the Mind w poll.pptx	✓
Week 7 Overview	✓
Week 7 Activities	✓
LearningCurve Module 4: Neural and Hormonal Systems Sep 30, 2018 10 pts	✓
LearningCurve Module 5: Tools of Discovery, Older Brain Systems, and The Limbic System Sep 30, 2018 10 pts	✓

Week 5		Take part in at least one SONA study (CO2)		Sign up for at least one online or in-person study on Canvas
Week 6	Biology of the Mind	Demonstrate an understanding of neurons and how they transmit information (CO2, Bloom's: Understanding). Explain how nerve cells communicate with other nerve cells (CO2, Bloom's: Understanding). Summarize the functions of the nervous system's main divisions, and identify the three main types of neurons (CO2, Bloom's: Understanding). Identify the structures of the brainstem	Modules 4-6	Complete LearningCurve activities Post Packback question/answers Complete Assess Your Strengths activity
		(CO2, Bloom's: Applying). Explain the functions of the thalamus, reticular formation, and cerebellum (CO2, Bloom's: Understanding). Explain the limbic system's structures and functions (CO2, Bloom's: Understanding). Recall which four lobes make up the cerebral cortex (CO2, Bloom's: Remembering). Explain the functions of the motor cortex, somatosensory cortex, and association areas (CO2, Bloom's: Understanding).		
Week 7	Learning and Thinking	Describe behaviorism's view of learning (CO1, Bloom's: Remembering). Apply the basic components of classical conditioning to learning situations (CO2, Bloom's: Applying). Explain how operant behavior is reinforced through positive and negative reinforcement (CO2, Bloom's: Understanding). Explain how cognitive processes affect classical and operant conditioning (CO2, Bloom's: Understanding). Explain how cognitive tendencies can assist and hinder our problem solving and decision making (CO5, Bloom's: Understanding).	Modules 20-22 and 26	Complete LearningCurve activities Complete Assess Your Strengths activity Post Packback questions/answers

Design support: Technology Support

Support like a Courseware System Integration with LMS
